

How to have the ideal LLumar® auto tint experience, from start to finish.

When you choose LLumar® tint and authorized installers, you're on the road to satisfying results. This guide will help pave the way even more, with information about what tint can do, what to expect at installation, and how to keep newly installed tint looking fresh.

Your part is just 4 simple steps. Your installer takes care of the rest.

1. Connect with an Installer

You and your car deserve professional treatment during window tint installation. So find more than just a tint installer. Find someone you connect with, who shares your concern for quality and results. Reach out to nearby locations, and see how they respond to your initial inquiry. Then have a short Q & A phone call. After that you'll know if an installer is right for you, or if it's time to explore more.

What to Ask

- ✓ How long have you been in business?
- ✓ Where can I find consumer reviews?
- ✓ Can I see photos of cars you've tinted?
- ✓ What's your average installation cost?
- ✓ Do you offer a manufacturer's warranty?

2. Select Your Ideal Style

During tint selection at your installer, expect to learn, explore and compare: tint shades, level of heat rejection, UV protection and glare control. Authorized LLumar installers have tools for this process, plus online previews of how your car will look with tint. If you're interested in the relationship between performance and price, ask about the differences between dyed, metallized and ceramic tints. There are differences in material and labor costs, depending on these details. Your installer will give you a price quote after you've selected your ideal tint for the make, model and year of your car.

What to Ask

- ✓ What is the difference between dyed, metallized and ceramic tint?
- ✓ How can I be confident my tint shade is legal?
- ✓ Can I preview how my car will look with tint?
- ✓ How much will it cost to install the tint I like on my car?

3. Relax During the Process

Typically, it takes several hours to have your entire car tinted. Authorized LLumar installers have comfortable waiting areas so you can spend that time on-site if you like, relaxing with Wi-Fi. And these facts about our tint installation will help you relax even more:

- Window glass is cleaned thoroughly first, to remove debris
- Tint is trimmed precisely to fit your exact make and model
- No harsh chemicals are used, only water-activated adhesives

What to Ask

- ✓ How far in advance do I need to schedule an appointment?
- ✓ Is there anything I need to do to prepare my car for installation?
- ✓ How long will my tint installation take?
- ✓ Can I wait on-site? What is your waiting area like?

What to Ask

- ✓ How long will my tint warranty last? What does it cover?
- ✓ How soon can I wash my car after tint installation?
- ✓ What do I need to know about long-term tint care?
- ✓ What if I have a problem with my tint after it's installed?

4. Enjoy LLife with LLumar

When you're reunited with your freshly tinted car, it will look better than when you handed over your keys. And fresh, new tint won't be the only thing that's different about your car. It will also have a manufacturer's lifetime limited warranty*. Your authorized installer can provide you with warranty details, plus a list of post-installation tips like these:

- Car windows should stay closed for the first 3 days.
- Haze or condensation is normal during curing, which takes 2-3 weeks. Parking your car in the sun during the day will accelerate this process.
- Use only soft cloth and mild window cleaners on the inside of car windows.
- Avoid window contact with abrasives, sharp edges and metal objects.

Contact an authorized LLumar installer today. Now you're really ready.

*Applies only to USA and Canada; certain restrictions apply; see a dealer for warranty details.
